

Success Stories

The Virtual Engine Evergreen Citrix Deployment Service at Mitchell Charlesworth

Mitchell Charlesworth, Chartered Accountants and Business Advisors, offer a locally based, complete financial solution for businesses and individuals in Chester, Liverpool, Manchester and Widnes.

The firm uses Citrix Virtual Apps and Desktops to provide staff with secure access to applications and data at all offices, as well as to support remote access when required to work off site.

The Challenge for IT

To take advantage of recent Citrix feature updates including support of Microsoft Teams, the firm decided to move from the Long Term Service Release 7.15 to the latest 1912 LTSR.

Citrix Partner Virtual Engine used their Evergreen Citrix Deployment Service to build the new Citrix Platform.

"Virtual Engine supplies consultancy and ongoing support for our Citrix and Microsoft applications, ensuring that systems are kept up to date and optimised for best performance.

The Virtual Engine Deployment Service has provided us with the ability to rollout new Citrix infrastructure in a far more efficient and effective manner.

Deployment timescales have been reduced from approximately five days to just a couple of hours. Automation has also greatly reduced any margin for error during the installation and upgrade process."

Paul Farrell, Head of IT, Mitchell Charlesworth

"Having seen the risks involved with in-place upgrades of existing Citrix environments, we are delighted that one of our valued customers have realised the risk free benefits of using our automated Citrix Evergreen Deployment Service."

Nathan Sperry, Head of Consulting, Virtual Engine
